

Espacio Food & Service Trade Show

Santiago, Chile
September 26-28, 2023

Chile has a market-oriented economy that is characterized by a high level of foreign trade and a reputation for strong financial institutions that have given it the strongest sovereign bond rating in South America. Real GDP is expected to grow by 3.2% per year in 2020-2025. Chile has been one of Latin America's fastest growing economies over the past two decades. Some of the benefits for exporting to Chile are due to the Free Trade Agreement that the U.S. has with Chile, which makes U.S. products more competitive. U.S. food products are known for their high quality and low health concerns.

US food products are known for their quality and superior health standards in Chile; these are some of the products with the best sales potential: beer, dairy and dairy products, pet food, pork products, snack foods, and ready-to-eat meals. Register with SUSTA and attend the Espacio Food & Service Trade Show which was founded in 2011 and considered one of the most important food industry events in Chile.
