Food and Agricultural Import Regulations and Standards

Report Categories:
Food and Agricultural Import Regulations and
Standards - Narrative

Approved By:
Marcela Rondon

Prepared By:
Hilde Brans

Report Highlights:
This report should be read in conjunction with the Food and Agricultural Import Regulations and Standards (FAIRS) report written by the U.S. Mission to the EU, GAIN 15051. This report focuses on the import regulations and standards that are not harmonized in the EU or where Belgium varies. For updates of the information provided in this report check the FAS/USEU website www.usda-eu.org.
Section I.  General Food Laws

General principles such as the precautionary principle are set out in the EU’s General Food Law Regulation 178/2002. According to a European Commission memo published in December 2012, around 98 percent of food legislation is harmonized at the EU level. U.S. exporters should be aware that when EU-wide legislation is incomplete or absent, national laws of Member States apply, often resulting in different rules in different Member States. National measures exist, for example, for certain food contact materials, botanical ingredients in food supplements, minimum and maximum levels for vitamins and minerals and for official control fees. Imported products must meet existing Member State requirements in cases where EU regulatory harmonization is not yet complete.

Belgium

Enforcement of EU food legislation is done by Member State officials. Auditing oversight of Member State performance is done by European Commission officials. The European Commission has the authority to initiate legal action in the European Court of Justice against Member States that are not complying with EU Directives and
Regulations. “Directives” define the result that must be achieved but leave to each Member State the choice of form and methods to transpose the directive into national laws. Regulations are binding in their entirety and automatically enter into force on a set date in all Member States. Belgium, as a member of the EU, conforms to all EU regulations and directives. There may be some variation among Member States in applying EU harmonized legislation.

The Belgian Food and Drugs Law is called “de Wet betreffende de bescherming van de gezondheid van de gebruikers op het stuk van de voedingsmiddelen en andere produkten / Loi relative à la protection de la santé des consommateurs en ce qui concerne les denrées alimentaires et les autres produits”. This law from 1977 provides the Belgian regulatory framework for all food products. It applies to domestically produced and imported food and other products including tobacco and cosmetic products. The main objective of this law is (1) health protection, (2) product safety, (3) ensuring that consumers have adequate and correct information and (4) promotion of fair trade. All amendments and supplementary food laws are published in “Het Belgisch Staatsblad/Le Moniteur Belge”, which can be consulted on www.staatsblad.be.

Belgium has a federal political structure. Food policy and safety are regulated at the federal level, agriculture at the regional level (Flanders and Wallonia). The Directorate-General for control of the Belgian Federal Agency for the Safety of the Food Chain (FAVV/AFSCA) has the responsibility for food controls. Laying down, implementing and enforcing measures related to food safety, animal health and plant protection are within the domain of the FAVV/AFSCA. The Federal Public Service (FPS) Health, Food Chain Safety and Environment is in charge of policy and legislation on food product standards, contaminants and animal and plant health. Quality schemes such as geographical indications and traditional specialties guaranteed fall under the competence of the FPS Economy, SMEs, Self-Employed and Energy. The Belgian Minister of Agriculture is responsible for the FAVV/AFSCA, the Animal, Plant and Food Directorate General of the FPS Health, Food Chain Safety and Environment and for the FPS Economy, SMEs, Self-Employed and Energy. For more information see www.federal-government.be/en.

Section II. Food Additive Regulations
For detailed information see http://www.usda-eu.org/trade-with-the-eu/eu-import-rules/food-additives/

C. Enzymes

The existing national provisions on the marketing of food enzymes will continue to apply until the adoption of an EU positive list of authorized enzymes.

D. Processing Aids
EU harmonized rules exist only for certain categories of processing aids: a list of extraction solvents allowed in the production of foodstuffs and food ingredients, along with their conditions of use has been established in Council Directive 2009/32/EC. Processing aids are subject to Member States national legislation, for Belgium this is the ‘Koninklijk besluit van 14 juli 1997 betreffende zuiverheidseisen voor additieven die in voedingsmiddelen mogen worden gebruikt / Arrêté royal du 14 juillet 1997 relatif aux critères de pureté des additifs pouvant être utilisés dans les denrées’.

**Section III. Pesticides and Contaminants**

**A. Pesticides**

[EU Regulation 1107/2009](http://www.eu-pesticides.eu/) sets out rules for the authorization of plant protection products. For the authorization/withdrawal of plant protection products, the EU is divided into three zones. Belgium together with The Netherlands, Czech Republic, Germany, Ireland, Luxembourg, Hungary, Austria, Poland, Romania, Slovenia, Slovakia and the United Kingdom fall in Zone B – Centre (see Annex I to regulation 1107/2009). The authorization of plant protection products fall within the competence of the FPS Health, Food Chain Safety and Environment.

**Section IV. Packaging and Container Requirements**

**B. Packaging Waste Management**

Several EU Member States have introduced national bans on the use of Bisphenol-A (BPA) in plastic food contact materials and other materials such as coatings. In September 2012, Belgium passed a ban on the use of Bisphenol-A, or BPA, in the packaging of food products for children less than three years old and also in plastic articles like spoons and plates for the same age group. The ban went into force on January 1st of 2013. Diverging laws in some EU Member States have created uncertainty and confusion as to what products that use or contain BPA can be placed on the market.

In November 2015, the European Commission published a "roadmap" to assess whether a new measure on BPA at EU level should be proposed, taking into account the European Food Safety Authority's (EFSA) updated scientific opinion published on January 21, 2015. In their press release, EFSA stated that the comprehensive re-evaluation of BPA exposure and toxicity concludes that BPA poses no health risk to consumers of any age group (including unborn children, infants and adolescents) at current exposure levels. Exposure from the diet or from a combination of sources (diet, dust, cosmetics and thermal paper) is considerably under the safe level (the "tolerable daily intake" or TDI).

Section V. Labeling Requirements
A. General requirements

The standard U.S. label fails to comply with EU labeling requirements. On December 13, 2014, the EU’s new “Food Information to Consumers (FIC)” regulation 1169/2011 became applicable to all pre-packaged food and drink products marketed in the EU, including those imported from third countries. The mandatory nutrition declaration requirement introduced by the new FIC regulation will apply as of December 13, 2016. However, if nutrition information is provided on a voluntary basis before this date, it must comply with the new rules.

4. Language requirements

Belgium covers 4 language areas. The Dutch language area is located in the Northern part of Belgium whereas the French language area is located in the South. Brussels, the capital of Belgium, is bi-lingual. Finally there is a small German language area which is located in the east and borders with Germany. Language has been a very sensitive issue for many decades. This language sensitivity is reflected in the labeling requirements. The label has to be in the language or languages of the language area where the product is being marketed.

Considering the size of the market, most food companies only use bi-lingual Dutch/French or tri-lingual Dutch/French/German labels. FAS/Brussels recommends that U.S. exporters adopt the latter option, as it will allow for products to be marketed not only in Belgium but also in France, Germany, The Netherlands, Austria, Switzerland and Luxembourg, or roughly a third of all EU consumers.

7. Minimum Durability

Annex X to the “Food Information to Consumers (FIC)” regulation 1169/2011 sets out rules for the indication of the date of minimum durability, use-by date and date of freezing. The use-by date must be indicated on individual pre-packed portions. The durability date AND the date of (first) freezing preceded by the words “frozen on” is required on labels of frozen meat, frozen meat preparations and frozen unprocessed fishery products. :

- The date shall be preceded by the words:
  ‘Best before’
  ‘Best before end’

- The ‘use by’ date shall be preceded by the words:
  ‘Use by’

- The date of freezing or the date of first freezing shall be preceded by the words:

In Belgium:

‘Tenminste houdbaar tot’
‘Tenminste houdbaar tot einde’

‘A consommer de préférence avant le’
‘A consommer de préférence avant fin’

‘Mindestens haltbar bis’
‘Mindestens haltbar bis Ende’

‘Te gebruiken tot’

‘A consommer jusqu’au’

‘Zu verbrauchen bis’
‘Frozen on’

‘Ingevroren op’

‘Produit congele le’

‘Eingefroren am’

13. Stick-on labels

It is allowed in Belgium to use stick-on labels on pre-packed consumer products.

14. Samples

Samples of products, which are not approved to export to the EU, for research purposes or to be handed out at trade shows can in some cases, be shipped to Belgium. This process can be expensive and burdensome. An application form to ask for an exemption can be requested at the Federal Agency for the Safety of the Food Chain (FAVV) by sending an email to import.export@favv.be.

Exceptions

Only the Federal Minister of agriculture can grant an exception to the existing labeling regulations. The granting of an exception would be very rare.

B. Other Specific Labeling Requirements

6. Special Use Foods

The EU’s new dietetic foods regulation 609/2013 will apply as of July 20, 2016. The scope of this regulation is limited to infant formula and follow-on formula, processed cereal-based food and baby food, food for special medical purposes and total diet replacement for weight control. Rules on foods and beverages for athletes or on foods intended for diabetics are still subject to Member State legislation. The marketing of dietetic foods for which no specific EU rules have been established must be notified to the Member State where the food is sold.

E-mail: jean.pottier@health.belgium.be

Section VI. Other Specific Standards

A. Novel Foods
Novel foods as defined in the EU’s Novel Food Regulation 2015/2883 need a pre-market authorization.

Point of contact in Belgium:
FPS Health, Food Chain Safety and Environment
Department for Foods, Animal Foods
and Other Consumption Products (DG for Animals, Plants and Foodstuffs)
Tel: +32 (0)2 524 73 51/52
E-mail: novelfood@health.belgium.be

D. Fortified Foods

EU Regulation 1925/2006 sets out harmonized rules on the addition of vitamins and minerals to food. However, maximum permitted levels of vitamins and minerals are not yet harmonized and still subject to Member States’ national rules.

Point of contact in Belgium:
FPS Health, Food Chain Safety and Environment
Department for Foods, Animal Foods
and Other Consumption Products (DG for Animals, Plants and Foodstuffs)
Tel: +32 (0)2 524 7351/52
E-mail: apf.food@health.fgov.be

F. Irradiated Foodstuffs

Harmonization of EU rules on food irradiation has been slow and only a few products have so far received EU-wide approval. Until the EU positive list is expanded, national authorizations continue to apply.

Point of contact in Belgium:
FPS Health, Food Chain Safety and Environment
Mr. Carl Berthot
Eurostation- Bloc II, 7eme étage
Place Victor Horta, 40 Boite 10
B-1060 Brussel, Belgium
Phone: +32 (0)2524 7369
carl.berthot@health.fgov.be

Any foodstuff which has been treated with ionising radiation must bear one of the following indications:

In Dutch:
- "doorstraald";
- "door straling behandeld";
- "met ioniserende straling behandeld";

In French:
- “traité par rayonnements ionisants”;
- “traité par ionization”;

-
Section VII. Facility and Product Registration

B. Product Registration

The introduction of foodstuffs with particular nutritional uses needs to be notified to the Member State where the food is sold. Exporters of vitamin-enriched foods or nutritional supplements are especially advised to check for the existence of specific Member State registration or notification requirements.

The competent authority for Belgium:
FPS Health, Food Chain Safety and Environment
Department for Foods, Animal Foods
and Other Consumption Products (DG for Animals, Plants and Foodstuffs)
Place Victor Horta, 40 Boîte 10
Bloc II - 7° étage
B-1060 Bruxelles
Tel: +32(0)2.5247351-52
E-mail: apf.food@health.fgov.be

Section VIII. Other Certification and Testing Requirements

B. Inspections

In Belgium the FAVV is responsible for the inspections. Criteria for laboratories conducting food controls have been harmonized but it is the Member States’ responsibility to designate laboratories that are allowed to perform analyses. A list of laboratories designated by Belgium to perform analysis can be found at the following internet link, http://www.favv.be/laboratories/.

Federal Agency for the Safety of the Food Chain (FAVV)
DG Laboratories
Director General Mr. Geert De Poorter
Phone: +32 (0)2 211.8726/27
CA-Botanique - Food Safety Center, 4th Floor
Boulevard du Jardin botanique 55
1000 Brussels, Belgium

Section IX. Import Procedures
C. Import duties

Information on Belgium’s customs authorities can be found at http://fiscus.fgov.be/interfdanl/.

It is possible to obtain Binding Tariff Information (BTI) from a member state’s customs authority to get the proper product classification. Through this system, traders know in advance the tariff classification of the goods they intend to import. BTI is legally binding in all the member states. Information on how to obtain a BTI can be downloaded from the European Commission’s Taxation & Custom’s website at http://ec.europa.eu/taxation_customs/customs/customs_duties/tariff_aspects/classification_goods/index_en.htm.

Customs authorities designated for the purpose of receiving applications and issuing Binding Tariff Information: Centrale administratie der douane en accijnzen Dienst Nomenclatuur (Tarief), Landbouw en Waarde Cel BTI North Galaxy – Building A – 8th Floor Koning Albert II-laan 33 1030 Brussel, Belgium

Customs provides information of imports from which the VWA selects the lots for further inspection. Regulation 2004/882/EC sets out the standards for control of compliance with the General Food Law.

The Import Process:

- Pre announcement: by Common (Veterinary) Entry Document (CVED or CED), issued by agent;
- Documentary Check: examination of the original required documents that accompany the consignment based on model certificate according to EU legislation, carried out by Customs based on an agreement between Ministry of Agriculture and Ministry of Finance;
- Identity Check: to ascertain that the products correspond to the information given in the accompanying certificates or documents;
- Physical Check: check on the product itself to verify compliance with food or feed law;

Section X. Copyright and/or Trademark Laws

A. Trademarks

Trademark registration in Belgium is based on Benelux legislation. Registration can be obtained for all 3 Benelux countries (Belgium, Netherlands and Luxembourg) through one process. Applications for trademark registration in the Benelux can be sent to: Benelux Merkenbureau (Benelux Trademark Office) Bordewijklaan 15 2591 XR The Hague, the Netherlands Phone: +31-(0)70-349 1111.

Appendix I. Government Regulatory Agency Contacts

All Belgian legislation is published in the Belgian official journal "Het Belgisch Staatsblad"/"Le Moniteur Belge". This journal is edited by the Federal Public Service Justice and can be consulted on-line at www.staatsblad.be or www.moniteur.be.
